

BioYouToon NEWSLETTER

RAISING YOUTH AWARENESS OF BIO-DIVERSITY
CONSERVATION VIA WEBTOON

PROJECT RESULTS

 17 JAN 2023 - MARCH 2025

As the BioYouToon project concludes, we are proud to share the innovative resources developed to promote biodiversity awareness among youth through digital storytelling. Explore the comprehensive tools and materials designed to educate and inspire:

FINAL RESEARCH REPORT

This report identifies barriers to youth participation in biodiversity conservation and proposes solutions, along with a training method for youth workers and educators to effectively engage and train young people in biodiversity protection.

E-MANUAL

A practical and insightful guide aimed at empowering and engaging young people in biodiversity conservation, helping them understand and protect the natural world.

TOOLKIT

An interactive resource that delves into biodiversity, its benefits, and conservation strategies. Designed for both individuals and educators, it offers engaging activities to foster a deeper understanding of biodiversity and its protection.

WEBTOON COMICS

Co-created with young participants and partners, these webtoons aim to raise awareness about biodiversity while empowering youth as knowledge multipliers and biodiversity ambassadors.

NEWSLETTER

Co-funded by the
European Union

A LEGACY OF ENGAGEMENT

Over the course of the project,
BioYouToon has successfully:

- Engaged youth across Europe in biodiversity education.
- Developed innovative digital tools combining storytelling and environmental science.
- Fostered collaborations between youth NGOs and researchers.

These resources will remain available to educators, youth workers, and young individuals committed to biodiversity conservation.
